

# CHROMALUX R20

## Full-spectrum incandescent bulb

### *The Pure Light From Scandinavia To See And Feel Better*

The Chromalux bulb has its origin in Finland, Land of the Midnight Sun, where life must be sustained in almost total darkness for a few months of the year. Extensive research and testing there resulted in the design of this unique light source which closely simulates natural daylight.

- **Bright and Vibrant Colors**

Chromalux lamps are made of pure Neodymium glass, which cuts down much of the yellow emission of the spectrum resulting in brighter and more vibrant colors. Chromalux creates a pleasing colorful and relaxing atmosphere that has shown to enhance people's sense of comfort and well being.

- **A Superior Reading Light**

Reducing the excessive yellow glare light (located in the center of the spectrum 550 nm) allows the eye to see with great ease throughout the entire visible spectrum. Chromalux glare-free light increases black and white contrasts, improves readability and reduces eyestrain allowing optimum visual comfort. Much more gentle to your eyes than common incandescent lamps or quartz illumination.

To order a Catalog #900000026 Halogen Full Spectrum bulb, call 804/254-2737
